

How to Infuse Wax with Cinnamon for CinnaCoal Premium Packs

Purpose:

Infused wax capsules can be added to briquette packaging to release a cinnamon aroma when heated. This is a premium option to enhance user experience.

Materials Needed:

- 100g natural beeswax or soy wax
- 10–15 ml cinnamon essential oil (or 2 tbsp ground cinnamon for natural infusion)
- Silicone mold or ice cube tray
- Double boiler or heat-safe bowl and saucepan
- Stirring stick or spoon
- Airtight container for storage

Instructions:

1. ****Melt the Wax****: Use a double boiler to gently melt the wax over low heat.
2. ****Infuse with Cinnamon****:
 - ****Essential Oil Method****: Add 10–15 ml of cinnamon essential oil and stir thoroughly.
 - ****Natural Infusion****: Add 2 tbsp of cinnamon powder, stir, and let steep for 10 minutes. Strain if needed.
3. ****Mold the Wax****: Pour the infused wax into small molds (e.g. 5g size). Allow to cool and solidify.
4. ****Storage****: Store capsules in a sealed container in a cool place until ready for use.

Usage Tip:

Place 1 capsule in each pack. It melts during ignition, releasing the cinnamon aroma naturally.
